This is not a definitive list of k-leather soccer shoes. Models are regularly introduced and discontinued. To determine if a shoe contains kangaroo skin, it's best to ask the salesperson and examine the shoe for content tags. Please let the staff know of your decision to purchase cleats that do not harm animals by choosing synthetic materials or fake leather (the more sustainable, the better). This is a first-of-its-kind list. Help us keep it accurate by emailing your findings to info@KangaroosAreNotShoes.org

* Special or limited edition

** Older model but currently available

Note: Diadora announced it will stop using k-leather in soccer shoes by the end of 2020
